Do more with less. Fewer exterior sightlines – a design plus with Kawneer’s GLASSvent™ visually frameless windows. GLASSvent™ Windows can be used with these storefront and curtain wall systems for single-source solutions:

GLASSVENT™ WINDOWS FOR STOREFRONT FRAMING

- Trifab™ 400 Framing System
- Trifab™ VersaGlaze™ 450, 451 and 451T (Thermal) Framing Systems
- EnCORE™ Framing System

GLASSVENT™ WINDOWS FOR CURTAIN WALL

- 1600 Wall Systems™
- 2250 L-R (Low Rise) Wall System
- 2250 IG (Inside Glazed) Ribbon Window/Curtain Wall System

Storefront and curtain wall GLASSvent™ Windows are available as project-out or outswing casement, without the sightline buildup you get when typical operating windows are added to a framing system.

GLASSvent™ Windows have everything you'd expect in a Kawneer window:

- Stainless steel four-bar hinges provide positive control for trouble-free operation
- Positive cast white bronze locking hardware delivers strength and security
- Pivot shoe roto-operator on project-out window
- Multi-point locks on casement window
- GLASSvent™ Windows for Curtain Wall tested to AAMA 501 and for blast resistance
- GLASSvent™ Windows for Storefront Framing tested to NAFS and ANSI/AAMA/NWWDA 101/I.S.2-97

But there's still more to GLASSvent™ Windows. Beyond its obvious advantages in new construction, GLASSvent™ Windows adapt easily to retrofit applications. This versatile window is an economical way to upgrade building aesthetics and function. The less you see, the more you want Kawneer GLASSvent™ Windows
