

- Threat Assessment Information Checklist -

Threat assessment information and/or blast criteria must be known in order for Kawneer to make a proper system selection. Often, this criterion is clearly indicated in the project specifications or on a site plan in the civil drawing series. Check one below and offer additional information if indicated. (NOTE: If incorrect or invalid information is provided, this engineering or estimating request will not be processed)

- Project specifications clearly indicate the blast/AT-FP criteria for the framing and glazing systems.
- Reference the attached site layout plan from the civil drawings that clearly indicates the AT/FP setbacks.
- FBI project
- VA project designated as Life-Safety Protected
- VA project designated as Mission Critical
- GSA/ISC project needing to meet the ISC security criteria, FAA project, or Private sector project

- Peak Blast Pressure = _____ psi

- Impulse = _____ psi*msec or Duration = _____ msec

- Security/Protection Level (*select one*)

- I-Minimum II-Low III-Medium IV-High V-Very High

or

- Glazing performance condition (*select one*)

- 1 2 3a 3b

DoD project

- Applicable Level of Protection: (*select one*)

- Low
- Very Low
- Other (please specify)_____

- Standoff Distance for Applicable Explosive Weight I: (*select one*)

- 148 ft (45 m) 82 ft (25 m) 33 ft (10 m) Other_____

- Standoff Distance for Applicable Explosive Weight II: (*select one*)

- 82 ft (25 m) 33 ft (10 m) Other_____

Requirements for the framing and glazing systems to be designed for blast/AT-FP have been waived for this project.

Please forward current glass schedule or glass make-up information with checklist***

Threat criteria or wavier provided by:

_____	_____	_____
Name (please print)	Title – Company	Date
_____	_____	_____
Name (please sign)	Email Address	Phone No.
